Areas from Where Examiner Picks up Topics for CSS & PMS English Essays in the Contemporary Run

1. Current Affairs and Global Trends:

Topics are often chosen to reflect significant events, advancements, and debates taking place around the world. This can include everything from breakthroughs in technology such as the rise of artificial intelligence to noteworthy geopolitical events, to contemporary social movements. By doing so, the examination can gauge a candidate's awareness of the world around them, their understanding of intricate global issues, and their ability to construct nuanced perspectives on these matters.

2. Interdisciplinary Themes:

The range of topics is deliberately broad and spans various disciplines, including politics, economics, social issues, science, technology, and philosophy. This varied selection serves a dual purpose: it provides candidates with a wide range of options, enabling them to select a topic that resonates with their knowledge and interests, and it challenges them to engage with areas potentially outside their comfort zone.

3. Philosophical and Quotation-based Topics:

Certain topics are based on famous quotes or philosophical concepts. These are particularly effective at testing a candidate's critical thinking skills. They require a candidate to delve deep into abstract ideas, form coherent arguments, and articulate these arguments effectively.

4. Societal Observations and Human Behavior:

Many topics involve an analysis of societal patterns, cultural shifts, or aspects of human behaviour. These sociology and psychology-based themes allow for an assessment of a candidate's ability to understand and analyze societal dynamics, as well as their insight into human nature.

5. Ethics and Morality:

Topics that revolve around ethical and moral quandaries are included to test how candidates handle complex dilemmas that have no clear right or wrong answer. They offer insight into a

candidate's ability to balance and consider different perspectives on contentious issues.

In short, the process of creating a diverse and comprehensive set of essay topics is aimed at evaluating candidates' English language skills, knowledge, and critical thinking abilities, as well as their understanding of global, societal, and philosophical issues.

What does the Examiner anticipate from Candidates in English ESSAY PAPER?

If you have ever analyzed the English Essay paper for the CSS, you might have read that the Examiner says in the instructions above which states

"Make sure you use different forms of discourses, e.g. ¹exposition, ²argumentation, ³description and ⁴narration. Credit will be given for ¹organization, ²relevance and ³clarity."

The instructions provided by the examiner refer to the four traditional modes of discourse in writing, which are exposition, argumentation, description, and narration. Each of these modes has a unique purpose and characteristics. Using a combination of these modes can make an essay more engaging and comprehensive. Here's a breakdown of each mode:

1. **Exposition:**

The purpose of expository writing is to explain, inform, or clarify. It presents a balanced analysis of a topic using facts, statistics, and examples. For instance, if a candidate is writing about "the rise of digital currencies," they may use exposition to explain what digital currencies are, how they work, and their prevalence in the current economy. This is like giving a simple, clear explanation about something. Imagine your friend has never seen a pineapple before. You would describe it as a fruit with a spiky green top and rough, patterned skin that's yellow inside and very sweet. That's an exposition.

2. **Argumentation:**

Argumentative writing presents a claim or a stance and provides evidence to support this position. It is persuasive in nature and requires logical reasoning. For instance, in an essay discussing "ethical consumerism," a candidate might argue for or against its feasibility, providing relevant evidence and arguments to support their stance. This is when you firmly believe in something and want to convince others about it. For example, you think that video games are not bad for kids. You'd argue that they can help improve

hand-eye coordination and problem-solving skills. You would provide evidence, like statements from experts or results from scientific studies, to make your point stronger.

3. Description:

Descriptive writing aims to paint a picture using words. It involves detailed observations and descriptions. While typically less prevalent in essay writing, it can be used effectively to illustrate a point. For example, in an essay on "climate diplomacy," a candidate could use descriptive writing to vividly explain the impacts of climate change in specific regions. This is like painting a picture with words. Let's say you just went to a fun fair. You might describe the bright lights of the Ferris wheel, the smell of popcorn in the air, the sound of children laughing, and the feel of cotton candy melting in your mouth.

4. Narration:

Narrative writing tells a story. It involves characters, a plot, and a distinct narrative voice. In an essay, this could take the form of a brief anecdote or personal experience to provide context or support a point. For instance, in an essay about "the transformation of education in the AI era," a candidate might include a narrative about their personal experience with online learning. This is telling a story. It could be about an adventure you had, like the time you went camping and saw a shooting star, or it could be a made-up story, like a tale of a brave knight saving a kingdom.

The examiner also emphasizes the importance of organization, relevance, and clarity in the essay:

MUST READ » [Mastering the Art of Essay Writing for CSS Exam in the Light of FPSC Examiners' Report](#)

1. Organization:

This refers to the logical and effective structuring of the essay. It involves having a clear introduction, body, and conclusion, and ensuring ideas flow logically from one to another. Just like when you tidy your room and put everything where it belongs, your essay should also be tidy. You should have a clear beginning, middle, and end, and your ideas should be grouped in a logical way.

2. Relevance:

This means that everything included in the essay should be pertinent to the topic at hand. Irrelevant information or tangents should be avoided. This means you should stay on topic. If the topic is about dogs, don't start talking about cats or fish. Stick to the subject of dogs only.

3. Clarity:

This refers to the readability and comprehensibility of the essay. Sentences should be clear and concise, and ideas should be expressed in a way that is easy to understand. This means that you should write so others can easily understand. Don't use very big words or complex sentences. Think about it like explaining the rules of a game to your friend. You want them to understand so you can start playing right away.

Tips for Writing an Effective English Essay for CSS & PMS Exam

Thus, candidates should strive to include different forms of discourse in their essays and ensure their writing is well-organized, relevant, and clear to produce a strong, comprehensive essay.

REMEMBER: If you find it difficult to meet the **word count with a narrow topic**, consider exploring the subject from various angles or perspectives, such as historical, sociological, ethical, or even personal. It's also helpful to delve into the implications of the issue, potential solutions, and any controversies or debates surrounding it. Use examples and evidence to support your points, but always ensure your content is relevant and contributes to the overall argument or understanding of the topic. If you've exhausted all these avenues and still find yourself falling short, it's important to prioritize quality over quantity. It's better to present a well-argued, concise essay than to dilute your content just to meet the word count. Remember, the word limit is a guide, not a hard rule. While it's essential to strive to meet it, your primary focus should be to comprehensively address the topic in a clear, logical, and insightful manner.

CSS Essay Paper 2024 (Comprehensive list-1)

These topics provide a broad scope for candidates to showcase their analytical abilities, understanding of global trends, societal observations, and philosophical insights. They encompass various domains such as technology, global politics, gender issues, environmental conservation, education, and cultural dynamics. These are prepared while keeping the current trend of CSS Exam, you will surely get these questions in your exam real paper:)
