### **Tehsildar KPK Exam 2021 Essay “Two wrongs do not make a right”**

Here’s an 800-words essay on the topic “Two wrongs do not make a right”:

The saying “two wrongs don’t make a right” is a common refrain that reminds us of the importance of finding fair and just solutions to problems. It’s easy to be tempted to try to solve a problem by committing another wrong or injustice, but this approach ultimately only leads to more problems and does not address the root cause of the issue.

In personal relationships, this principle can be applied in many different situations. For example, if one person does something wrong, it’s not helpful to respond by doing something wrong in return. This only escalates the conflict and can lead to a cycle of harm and retaliation. Instead, it’s important to try to communicate and find a way to resolve the issue and move forward. This might involve apologizing, seeking mediation, or finding a way to make amends.

The principle of “two wrongs don’t make a right” can also be applied to larger social and political issues. For instance, when a government responds to a perceived threat by committing human rights abuses or using violence, it only creates more problems and does not address the root cause of the conflict. This type of response is often fueled by fear or anger, but it ultimately does not lead to a resolution and can even further alienate or harm those who are already marginalized or disadvantaged. Instead, it’s important to try to find a

way to resolve the issue peacefully and fairly, perhaps through diplomacy or dialogue.

Similarly, when groups or individuals feel wronged or marginalized, it's important to try to find solutions that address the root causes of their grievances, rather than resorting to violence or other forms of harm. This might involve working towards social and political change, or finding ways to provide support and resources to marginalized communities. For example, if a group of people feel that they are not being treated fairly or given equal opportunities, it's important to try to understand the root causes of their grievances and work towards a solution that addresses these issues, rather than responding with violence or other forms of harm.

One way to think about the principle of "two wrongs don't make a right" is to consider the long-term consequences of our actions. When we respond to a problem or conflict with violence or harm, it might seem satisfying in the moment, but it often leads to more problems in the long run. On the other hand, if we work towards fair and just solutions, we can create a more harmonious and peaceful society in the long term.

Moreover, "Two wrongs don't make a right" can also be applied to ethical dilemmas and decision-making. For example, consider a situation where a company is facing a difficult financial situation and is considering cutting corners in order to save money. It might seem tempting to engage in unethical practices, such as cutting corners on safety regulations or cutting corners on the quality of products, in order to save money in the short term. However, this approach ultimately does not address the root cause of the financial problem and may even create more problems in the long run, such as legal consequences or loss of customer trust. Instead, it's important to try to find a solution that is ethical and addresses the root cause of the financial problem.

The principle of "two wrongs don't make a right" can also be applied to parenting and discipline. For example, consider a situation where a child has misbehaved and a parent is considering punishing the child. It might seem tempting to respond with anger or harsh punishment, but this approach does not address the root cause of the misbehaviour and may even create more problems in the long run, such as a breakdown in the parent-child relationship or a lack of trust. Instead, it's important to try to find a solution that addresses the root cause of the misbehaviour and helps the child learn from the experience. This might involve setting clear boundaries and consequences, as well as providing support and guidance to help the child learn from the experience and develop self-regulation skills.

So, it's important to recognize that finding fair and just solutions to problems is not always easy, and it may require a lot of effort and compromise. However, the effort is worth it in the

long run, as it helps to create a more just and harmonious society for everyone.

In conclusion, the saying “two wrongs don’t make a right” is a valuable reminder that trying to solve a problem by committing another wrong or injustice only creates more problems and does not address the root cause of the issue. It’s important to strive for fair and just solutions that address the root cause and work towards a resolution. By working towards peaceful and fair resolutions, we can create a more just and harmonious society for everyone.
